Computer Vision & Embedded AI Engineer

French AI Engineer (6+ years exp) specializing in Computer Vision and Embedded Deep Learning. Expert in bridging the gap between advanced ML research and robust software engineering.

Target Role: Seeking challenging positions as a **Computer Vision / Embedded AI Engineer** (open to broader AI/ML), focusing on high-performance edge applications.

PROFESSIONAL EXPERIENCE

Consultant – AI & Computer Vision Engineer

Nov. 2020 – Present

Technology & Strategy, Strasbourg (FR) & Stuttgart (DE)

- **Noremat (Autonomous Mowing)**

- Engineered embedded semantic segmentation (DeepLabV3+, Jetson Orin NX).
- Optimized pipeline (ROS 2/TensorRT) for 10 FPS (<100ms latency) with safety-critical fallback behaviors.

- **ARQUUS Defense (Path Detection)**

- Delivered off-road navigation demonstrator; refactored training pipeline across 15+ architectures.
- Orchestrated continuous CI-benchmarking to ensure robust validation in diverse environments.

- **AimFlow (MLOps Platform - Sole Engineer)**

- Conceived and built a standalone MLOps desktop application (Tauri/React) to automate the full model lifecycle (MLflow, Optuna).

- **AimLab (Annotation - End-to-End Ownership)**

- Delivered production-ready tool integrating SAM 2 for zero-shot assisted annotation, significantly accelerating R&D iteration loops.

- **Bosch (Real-Time Edge AI)**

- Deployed real-time object detection (YOLO/NanoDet) on NXP i.MX 8 hardware.
- Implemented pseudo-labeling algorithms slashing manual annotation overhead by 50-80%.

Data Scientist Intern

Apr. 2020 – Oct. 2020

Alstom, Tarbes (FR)

- **Locomotive Anomaly Prediction**

- Developed embedded ML models for freight wheel slip-stick anomaly prediction.
- Migrated legacy C/Matlab codebase to a modern Python ecosystem, enhancing R&D experimentation agility.

TECHNICAL SKILLS & LANGUAGES

- **Languages:** Python, C, C++, TypeScript.
- **AI & Computer Vision:** PyTorch, TensorFlow, OpenCV, SAM 2, DeepLabV3+, YOLO, SMP.
- **Embedded & Deployment:** NVIDIA Jetson (Orin NX), TensorRT, ONNX, ROS 2, Isaac ROS, GStreamer.
- **Tools & MLOps:** Linux, Docker, MLflow, Optuna, FastAPI, React, Tauri, SQLite.
- **Languages:** French (Native), English (Fluent - C1), Chinese (Notions), Spanish (Notions).

EDUCATION, CERTIFICATIONS & INTERESTS

Education: EISTI - Master in CS/AI (2020) | EPF - Integrated Scientific Prep. Program (2016).

Certifications: IBM Data Science & Applied AI, UC Irvine IoT/Embedded Systems (*Coursera*).

Interests: Padel, Football, F1, Esports, Game Development, Algorithmic Strategy, Reading.
